

Boil Water Notice for Community Public Water Systems

Date: 10/23/2026

Due to a leak on a main transmission line caused by a utility company hitting the line this has caused our PSI to drop below allowed PSI, the Texas Commission on Environmental Quality has required the City of Point Public Water System (Identification Number: TX 1900004) to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc.). Children, seniors, and people with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, the public water system officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, the public water system will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice.

If you have questions concerning this matter, you may contact:

- Rhonda Allbritton, Water Supervisor, phone: 903-474-1083
- Tasha Wilk, City Secretary, phone: 903-598-3296
- City of Point, 320 North Locust Street, Point, Texas 75472
- Phone: 903-598-3296, 903-474-1083, or 903-474-3028
